International Accreditation

International accreditation is more than an administrative milestone, it is a global recognition of the university's excellence in education, research, and governance. It ensures that every academic aspect meets international standards, aligning the quality of graduates, curricula, and campus facilities with leading universities around the world.

Universitas Airlangga (UNAIR) has demonstrated this commitment through international accreditation for 58 programs across undergraduate, master's, doctoral, medical specialist, medical sub-specialist, and professional levels. This achievement reaffirms UNAIR's standing as a world-class university dedicated to nurturing outstanding, competitive graduates who contribute to global progress.

Prof. Dr. Muhammad Madyan,
S.E., M.Si., M.Fin.

Rector of Universitas Airlangga

Message from Our Rector

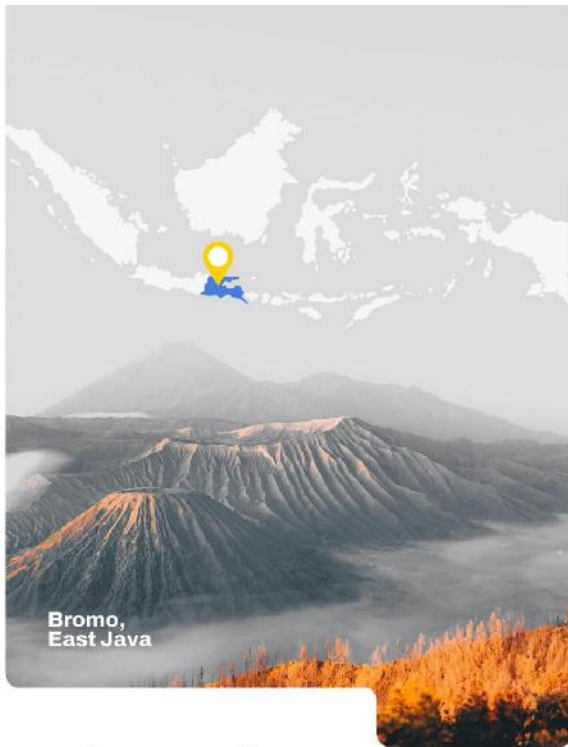

As the Rector of Universitas Airlangga, it is an immense pleasure and privilege to welcome you to our esteemed institution. Established in 1954, Universitas Airlangga has a long and distinguished heritage, rooted in a commitment to academic excellence, pioneering research, and dedicated community services. We stand proudly as one of Indonesia's leading universities, driven by the vision of becoming an independent, innovative, leading university at the national and international levels, a pioneer in the development of science, technology, and humanities with religious morals.

At the heart of Universitas Airlangga lies a dedication to fostering intellectual growth and nurturing the next generation of leaders, thinkers, and innovators. Our academic landscape is rich and diverse, spanning the crucial fields of health science, natural/life science, social-humanities science, and engineering sciences. We are committed to delivering rigorous, forward-thinking academic programs that equip our students with both deep theoretical knowledge and the practical skills essential for success in an increasingly complex global environment. This dual focus is strengthened by our extensive collaborations with industry, government bodies, and international partners, ensuring our graduates are not only job-ready but future-proof.

Our distinguished academic community, composed of renowned scholars and experts, is the engine of our research prowess. Their groundbreaking work addresses critical local and global challenges, significantly contributing to advancements in fields such as tropical disease management, public health, social policy, and sustainable development. We actively foster an environment where interdisciplinary collaboration thrives, pushing the boundaries of knowledge and translating discoveries into tangible societal benefits.

We are deeply committed to upholding the values of "excellence with morality", a principle that guides all our endeavors. This commitment includes championing a culture of innovation, maintaining a strong dedication to multiculturalism, and ensuring an inclusive and diverse campus environment.

I am confident that Universitas Airlangga will continue to inspire and prepare future generations who will contribute meaningfully and impactfully to the advancement of Indonesian society and the broader global community. I wholeheartedly invite you to explore the myriad of academic, research, and collaborative opportunities that await you at Universitas Airlangga and to join us in our mission to drive positive change through world-class education and research.

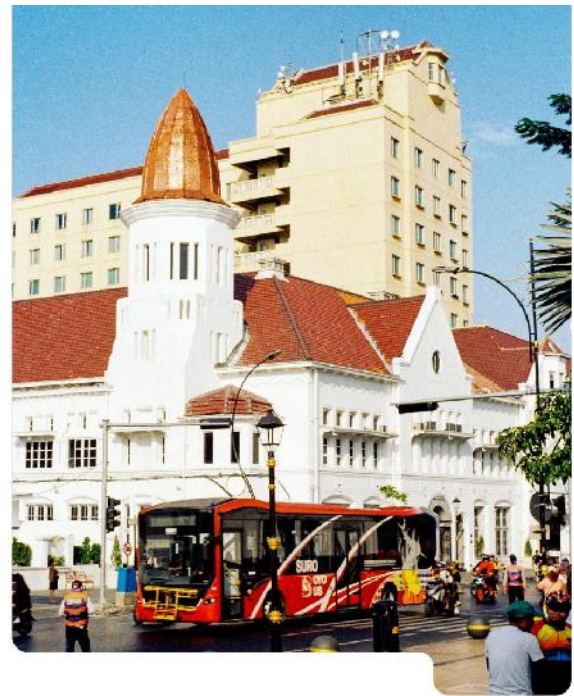

Indonesia: Harmony in Diversity

Indonesia is a nation with a long and rich history of civilization. Its strategic location between the continents of Asia and Australia, as well as the Indian and Pacific Oceans, has made it an important crossroads since ancient times, a hub of global trade and cultural exchange.

Renowned as the world's largest archipelago, Indonesia comprises more than 17,000 islands stretching along the equator. Its tropical climate gives rise to an exceptionally diverse landscape, from beaches and mountains to valleys, forests, and savannas. Among its many celebrated destinations are Bali, Bromo, Lombok, Raja Ampat, Lake Toba, Dieng, and Toraja—each offering a glimpse of Indonesia's natural splendor.

Beyond its landscapes, Indonesia is home to extraordinary cultural diversity. With over 275 million people representing hundreds of ethnic groups, languages, religions, and traditions, the nation lives in harmony under the motto *Bhinneka Tunggal Ika*, "Unity in Diversity." This balance between difference and harmony forms the essence of Indonesia's identity.

For international students, researchers, and partners, Indonesia offers more than an academic destination. It provides a living laboratory for studying cultural resilience, innovation, and social transformation within one of the world's fastest-growing economies.

Surabaya: A Gateway to Knowledge, Innovation, and Culture

As one of Indonesia's major metropolitan centers, Surabaya is a dynamic city known for its history, progress, and entrepreneurial spirit. Often referred to as the "City of Heroes," Surabaya played a pivotal role in Indonesia's independence movement and continues to embody the nation's drive for growth and innovation.

The city's strategic location on the northern coast of East Java provides comprehensive access by air, land, and sea to all regions in Indonesia. It also serves as a convenient gateway to prominent destinations such as Mount Bromo in Probolinggo, the Ijen Crater in Banyuwangi, and the natural charm of Malang and Batu.

Surabaya's rapid development is supported by strong educational institutions, industries, and creative communities. Among them, Universitas Airlangga stands as one of the city's most influential centers of knowledge and innovation. Located in the heart of Surabaya, Universitas Airlangga, one of Indonesia's oldest and most respected universities, continues to make a profound impact through education, research, and community service.

For international partners, Surabaya represents a promising ecosystem for collaboration. It is a city where tradition meets technology, and where academic excellence and innovation contribute directly to social progress and sustainable development.

Universitas Airlangga

A Legacy of Excellence with Morality

Founded on November 10, 1954, and inaugurated by Ir. Soekarno, the First President of the Republic of Indonesia—Universitas Airlangga (UNAIR) has grown into one of the country's most distinguished institutions of higher learning. For decades, it has stood at the forefront of education, research, and community engagement, shaping generations of leaders and innovators.

Today, UNAIR continues to evolve as a forward-looking university with a global reputation, guided by its enduring commitment to *Excellence with Morality*.

A Vision for Global Impact

UNAIR envisions becoming an independent, innovative, and internationally recognized university that advances science, technology, and the humanities with moral and social responsibility.

This vision lives through its teaching, research, and community initiatives—each designed to address real-world challenges and contribute meaningfully to human welfare. From health sciences and sustainable technologies to social transformation and policy innovation, UNAIR's work bridges discovery with purpose.

A Culture that Connects Values and Action

At UNAIR, Excellence with Morality is more than a guiding principle, it shapes how knowledge is created, shared, and applied. The university nurtures an academic culture where curiosity meets conscience, and where ethical awareness and empathy grow alongside scientific rigor.

Students and researchers are encouraged not only to excel in their fields but to make a difference, to transform insight into impact. Across its faculties and research centers, UNAIR builds bridges between local wisdom and global perspectives, working with communities, industries, and international partners to foster innovation that serves society.

WHY UNAIR?

A Hub of Learning, Collaboration, and Opportunity

For international students, UNAIR offers more than an academic destination, it is an entry point to the cultural richness and diversity of Indonesia. Situated in Surabaya, a dynamic city at the crossroads of the archipelago, UNAIR provides an environment where education connects with real-world experience and intercultural understanding.

For researchers and institutional partners, UNAIR offers access to a thriving network of experts, modern research facilities, and a shared commitment to the United Nations Sustainable Development Goals. Through joint research, academic exchanges, and community partnerships, the university creates opportunities for collaboration that lead to shared growth and long-term impact.

Research for Global Impact

At Universitas Airlangga (UNAIR), research and community engagement are driven by purpose and impact. Every study is designed to create real change, advancing knowledge while improving lives. Through a problem-based research approach, UNAIR ensures that innovation remains closely connected to the needs of society, transforming ideas into practical solutions that empower communities and shape a better future. Guided by a mission to advance knowledge and serve humanity, UNAIR fosters a dynamic culture of inquiry that bridges disciplines and connects communities worldwide.

491 Collaborations
171 Institutions

Connect with Our Scholars

Universitas Airlangga (UNAIR) continues to reinforce its academic excellence and global reputation through remarkable accomplishments in scholarly publishing. As of September 2025, UNAIR manages:

20 Journals Indexed Scopus
1 Journals in ESCI-Web of Science
77 Journals Listed in DOAJ
95 Journals Indexed in SINTA

Research for Excellence

Its research communities drive advancements in fields ranging from tropical diseases and stem cell science to green economy and patient safety. Guided by the vision of "Excellence with Morality," UNAIR transforms knowledge into real-world solutions, fostering research that empowers communities and elevates global well-being.

196
Research Groups

12
Research Centers

8
Centers of Excellence

- TROPICAL DISEASES
- STEM CELL
- SKIN AND COSMETIC TECHNOLOGY
- BIO-MOLECULE ENGINEERING
- PATIENT SAFETY AND QUALITY
- GLOBAL EMERGING AND RE-EMERGING INFECTIOUS DISEASES
- HEALTH AUTONOMY
- CONSERVATION & GREEN ECONOMY

All journals are published by Universitas Airlangga (UNAIR) and are free to access. These accomplishments reflect UNAIR's ongoing commitment to advancing knowledge dissemination, research visibility, and international collaboration across diverse academic disciplines. Full journal list available at

e-journal.unair.ac.id

UNAIR actively contributes to scientific advancement through impactful research, especially in public health. Notable innovations include:

- **INAVAC**, Indonesia's homegrown COVID-19 vaccine
- **Vaccines for African Swine Fever (ASF)** and **Foot-and-Mouth Disease (FMD)**

These breakthroughs exemplify UNAIR's dedication to advancing science for societal benefit.

VACCINE DEVELOPMENT

Inavac Vaccine is a vaccine developed from an inactivated virus platform. Through this platform, SARS-CoV-2 is modified and inactivated so that it can no longer replicate or cause harm. The latest vaccine development: Vaccines for African Swine Fever (ASF) and Foot-and-Mouth Disease (FMD)

EXCELZYME

Excelzyme consists of a consortium of enzymes that work synergistically to optimize the processing of agricultural waste containing lignocellulose. The raw materials for Excelzyme are sourced from Indonesia's rich natural resources, harnessing the nation's abundant potential.

PUA-SKIN

PUA-Skin is an innovative product developed by Universitas Airlangga that helps regenerate skin cells. In its development process, researchers utilize metabolites produced by the cell system. Studies have shown that these substances contain growth factors that function to promote the regeneration of skin cells.

DENTOLASER

Dentolaser is a low-power diode laser instrument (20mW–200mW) that is safely used for antimicrobial therapy and cellular biomodulation in the treatment of oral and dental diseases. Conditions that can be treated using Dentolaser include periodontitis, dental caries, and root canal or endodontic infections.

ALLERGENIC EXTRACT

Allergenic Extract is used as a diagnostic and allergen immunotherapy tool, packaged in 5 ml vials. It is designed for the diagnosis and immunotherapy of five types of allergies: house dust mites, milk, eggs, shrimp, and chicken.

ELECTRIC VEHICLES

UNAIR's line of electric vehicles is a statement of commitment to foster sustainable transportation: SAGA, an electric sport touring motorcycle with a cruising range of 118 km and a top speed of 130 km/h; ALERTA, an energy-efficient electric go-kart designed to promote green recreational and race kart; OSCAR, a prototype single-seat car engineered for maximum energy efficiency, and AUREN, an urban car with a design focus on minimizing both weight and drag.

Building a Sustainable Future

At Universitas Airlangga (UNAIR), sustainability is more than a goal, it is a fundamental part of our identity. As a leading institution, we integrate the Sustainable Development Goals (SDGs) into our education, research, and community initiatives, ensuring that our contributions drive real and lasting impact.

Universitas Airlangga's commitment to the Sustainable Development Goals (SDGs) is reflected in its strong performance in the Times Higher Education (THE) Impact Rankings 2025.

Universitas Airlangga is committed to breaking the cycle of poverty through education, innovation, and compassion. Every student, regardless of background, has access to quality education. Beyond campus, UNAIR empowers communities through entrepreneurship mentoring, small business support, and sustainable innovation training. The university also leads in advancing public health with partners such as UNICEF, WHO, and Indonesia's Ministry of Health, driving national immunization programs and the Inavac vaccine initiative. Local efforts like the Ksatria Airlangga Hospital Ship and "One Health Center, One Ob-Gyn" improve maternal and child health, reduce stunting, and extend healthcare access to remote regions. This accomplishment reaffirms that Universitas Airlangga's initiatives extend far beyond local impact, earning global recognition for their meaningful contribution to sustainable development and societal progress.

UNAIR champions gender equality, environmental sustainability, and community well-being as integral parts of its mission. The university upholds strong anti-discrimination measures through policies such as the establishment of the Task Force for Prevention and Handling of Violence and a campus-wide smoke-free policy. In environmental stewardship, UNAIR operates eight wastewater treatment plants, implements rainwater harvesting and smart farming systems, supports clean water access through well-building projects, utilization of renewable energy, and conservation of coastal areas. Collaborations with global partners, including the Leiden-Delft-Erasmus Consortium, further drive community-based waste management and water restoration programs. Through its dedication to education, equity, health, and sustainability, Universitas Airlangga continues to shape a compassionate, inclusive, and resilient future for all.

Rankings

 ners.unair.ac.id

The Faculty of Nursing is a pioneer in nursing education in Indonesia, committed to developing professional, ethical, and globally competitive nurses guided by the vision of innovation in caring. Supported by Centers of Excellence such as Dementia and Aging Care Research Centre and Research Center in Advancing Community Healthcare, the faculty integrates education, research, and community service to strengthen health systems and promote global collaboration. Through initiatives like the Nurse Labor Market platform, recognition as a WHO Collaborating Centre, and ASIIN-accredited programs, the faculty continues to advance nursing science, digital innovation, and workforce development under the theme "Indonesian Nurses Caring for the World."

Innovation is implemented through community-oriented learning and research translation, including disaster preparedness courses, project-based learning, and product development such as Diabetami and herbal ginger supplements. The faculty is equipped with modern laboratories, including CBT, OSCE, and disaster-emergency equipped with the Emergo Train System for simulation-based education. These facilities and initiatives ensure that academic excellence, research impact, and social responsibility are aligned to improve community well-being and global health outcomes.

FACULTY OF FISHERIES AND MARINE SCIENCES

The Faculty of Fisheries and Marine Sciences stands at the forefront of innovation in fisheries and marine science. Dedicated to sustainable aquatic resource management, the Faculty combines ecology, biotechnology, and entrepreneurship to shape future-ready experts and solutions for global marine challenges. With strengths in Fish Health and Environmental Management and Biopharmaceutical Development including marine biota, functional foods, and nutraceuticals, the Faculty leads impactful research that bridges science and industry.

Internationally recognized through ISO, IWA, Malcolm Baldrige, and ASIIN accreditations, the Faculty continues to uphold world-class academic standards. Its Salt Research Center exemplifies this excellence, producing high-purity salt and innovative derivatives that empower coastal communities in East Java.

Supported by modern facilities, six advanced laboratories, and aquaponics learning environments, the Faculty provides an engaging and research-driven academic experience. At the global level, the Faculty has established international collaborations through Double Degree Master's Programs in Fisheries and Marine Biotechnology with the Department of Biotechnology, National Pingtung University of Science and Technology (Taiwan) and the Graduate School of Global Food Resources, Hokkaido University (Japan), as well as a Master's Program in Fisheries Science with the Faculty of Science and Technology, Prince Songkla University (Thailand).

FACULTY OF VOCATIONAL STUDIES

vokasi.unair.ac.id

Faculty of Vocational Studies is a leading faculty dedicated to applied education that produces work-ready, adaptive, and globally competitive graduates. Established on May 14, 2014, the Faculty evolved from diploma programs that had been part of eight faculties since 1984.

Bridging academia and industry, the Faculty offers practice-based and technology-driven learning across various disciplines, including health, business, information technology, and communication. All programs are supported by modern laboratories in banking, marketing, hospitality, and multimedia. The learning proportion emphasizes ≥ 60 -70% practical work and ≤ 30 -40% theory. The Faculty of Vocational Studies offers students opportunities to enter the workforce/industry. FV UNAIR also expressed its support for achieving the Sustainable Development Goals (SDGs) in sustainable development, mastery of applied skills, with the aim that graduates are ready to work directly in the industrial/business world. Vocational graduates are highly sought after by industry due to their applied competencies.

The faculty maintains a strong link and match with industry through national and international internships and 14 flagship international programs such as Ubiquitous Colloquium, CHIPs, BATTTRA, LAC, and OSH Week. Carrying the spirit of "Excellent Vocational Education for an Advanced Indonesia," the faculty is committed to developing innovative professionals who contribute to education quality, community welfare, and sustainable economic growth.

FACULTY OF ADVANCED TECHNOLOGY AND MULTIDISCIPLINE

#5

INDONESIA

- Electrical & Electronic Engineering
- General Engineering
- Mechanical & Aerospace Engineering

THE World University Rankings

The Faculty of Advanced Technology and Multidiscipline is a young, visionary, and future-oriented faculty designed to address the needs of the Industrial Revolution 4.0 era through the integration of technology, science, and humanity. The faculty holds a strategic advantage as the first in Indonesia to introduce three pioneering study programs: Nanotechnology Engineering, Data Science Technology, and Robotics and Artificial Intelligence Engineering, positioning itself as a trailblazer in advanced technology education in the country. In supporting internationalization and strengthening global competencies, the faculty has developed three flagship international programs: Sustainable Energy and Green Technology Applications (SEGTA), Student Mobility Program and Industrial Visit of Advanced Technology (SMARTA), and Sustainable Industrial Devices, Artificial Intelligence, and Internet of Things (SIDAFIT). These initiatives provide students with opportunities to engage in academic exchange, research collaboration, and industrial experiences in various countries.

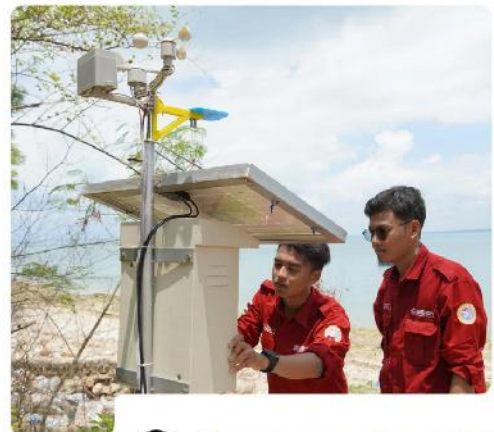

The faculty's innovations have made significant impacts at both national and international levels. One of its flagship projects, BANGGA EVCS (Barata Airlangga EV Charging Station), is the result of strategic collaboration with PT Barata Indonesia through the Matching Fund 2023 program, supporting the transition toward clean energy. The faculty has also produced several electric vehicle prototypes developed by the EV OS team, including ALERTA (electric go-kart), OSCAR (electric car), ESA EV (electric scooter), and SAGA (electric trail bike). In the field of Internet of Things (IoT) based research, The faculty has created innovations such as AIRFEEL, a weather and air quality monitoring device that has obtained intellectual property rights; ARSENIK, an intelligent hydroponic monitoring system for farmers; and multifunctional robots such as ARTA (Airlangga Robotic Triage Assistant) and ISYANA, a patented disinfectant-spraying robot.

BANYUWANGI FACULTY OF HEALTH, MEDICINE AND NATURAL SCIENCES

Banyuwangi Faculty of Health, Medicine and Natural Sciences is one of the university's strategic faculties located at Banyuwangi Campus. Situated in the easternmost region of Java Island, distinct from the main campus in Surabaya, this faculty embodies Universitas Airlangga's commitment to strengthening the One Health Approach at a regional level by integrating human, animal, and environmental health. Guided by its vision to be an independent, innovative, and leading faculty, FIKKIA develops science and technology based on Banyuwangi's unique local potential. This vision is actualized through specialized programs: Aquaculture focuses on sustainable fish and shrimp farming and aquatic environmental conservation. Veterinary Medicine on wildlife conservation and preservation, Public Health on addressing geo-eco-cultural health challenges, and Medicine on pioneering Travel Medicine. Through a combination of research, education, and community service, the faculty produces outstanding graduates who are adaptive to global health challenges and committed to maintaining the balance between humans, animals, and the environment.

The faculty commitment to excellence is demonstrated through applied research and innovations that directly benefit the community, particularly in its defined areas of distinction. It is supported by leading facilities such as the Teaching Animal Facilities, bioscience laboratories, and applied research centers that enable interdisciplinary collaboration. With a strong spirit of global cooperation, the faculty continues to expand academic and research partnerships at the international level, enhancing the capacity of its academic community to contribute to the advancement of science and global health. Through research based on local potential and oriented toward community welfare and environmental sustainability, the faculty affirms its role as a center of excellence in eastern Indonesia, contributing to the achievement of the Sustainable Development Goals.

POSTGRADUATE SCHOOL

SPS organizes a training program on herbal medicine processing in remote regions.

Postgraduate School of Universitas Airlangga offers master's and doctoral programs that emphasize a multidisciplinary approach focused on research, innovation, and solutions to various global challenges. The Postgraduate School is committed to being a dynamic and interdisciplinary learning hub. More than 124 alumni have gone on to hold significant positions in government, corporations, and professional institutions around the world. This achievement is further strengthened by international recognition, such as the membership of the Master's Program in Forensic Science in the Asia Forensic Sciences Network (AFSN), as well as strategic collaborations between the Postgraduate School of Universitas Airlangga and the Malawi University of Science and Technology.

In the field of research, the Postgraduate School has five research centers: the Center of Good Governance and Bureaucracy Reform; the Center of Women Empowerment in Law Enforcement; the Center for Civil Society Studies; the Center for Environmental and Sustainable Energy Studies; and the Center for Creative Industry Studies.

Registration Requirements for International Candidates

- A diploma for graduates of 2023 and 2024, or a Certificate of Enrollment in Grade XII from the school for graduates of 2025, must contain personal identification information and the applicant's recent photograph, and must bear an official stamp or seal.
- Applicants must be a maximum of 25 years old as of July 1, 2025.
- Applicants must have an English Proficiency Certificate with a minimum score of TOEFL iBT 60, TOEFL CBT 173, TOEFL ITP 500, IELTS 5.5, or Airlangga English Language Proficiency Test (ELPT) 500.
- Applicants must be in good health to ensure that their condition does not interfere with the learning process in their study program.
- Applicants must provide a Motivation Letter.
- Applicants must upload their high school report cards from semester 1 to semester 5.

SHORT PROGRAMS

AMERTA

**ACADEMIC MOBILITY
EXCHANGE FOR
UNDERGRADUATE AND
MASTER STUDENTS**

UNAIR's
tailor-made
programs

is an international semester exchange program organized by Universitas Airlangga. The program provides international students with the opportunity to spend one semester studying at UNAIR, experiencing Indonesia's rich academic and cultural environment firsthand.

AMERTA offers on-site courses designed to highlight uniquely Indonesian perspectives across a range of disciplines, including social and cultural studies, economics, natural sciences, and health and life sciences. This year, the program has been further refined to better accommodate the academic interests and learning needs of international participants. AMERTA now encompasses three distinct schemes:

- **AMERTA Regular:** Provides international students the opportunity to join in-class courses taught in English across various disciplines.
- **AMERTA Internship:** Allows international students to gain practical experience through internships in Indonesia relevant to their field of study.
- **AMERTA Research:** Enables international students to conduct research in Indonesia under the supervision of Universitas Airlangga experts in their chosen field.

AIRVENTURE

AIRVENTURE is an immersive summer program designed for international students seeking hands-on experience in environmental and sustainability studies. Through this program, participants engage directly in activities related to the protection, preservation, management, and restoration of biodiversity—a vital natural resource that must be carefully safeguarded for future generations.

Aligned with the United Nations Sustainable Development Goals (SDGs), AIRVENTURE focuses on the theme: "Protect, restore, and promote sustainable use of terrestrial ecosystems; sustainably manage forests; combat desertification; and halt biodiversity loss."

GLOBAL PERSPECTIVES, LOCAL INSIGHT: TAILOR-MADE PROGRAM AT UNIVERSITAS AIRLANGGA

Embark on a transformative academic and cultural journey with Universitas Airlangga's Tailor-Made Programs, uniquely crafted study abroad experiences designed to match the specific interests and academic needs of international students, faculty, and professionals. Spanning two to four weeks, these customized programs blend thematic coursework with immersive cultural and language activities, set in both UNAIR's dynamic campus and surrounding local communities.

Each program is thoughtfully co-developed with global partner institutions, ensuring meaningful engagement and real-world relevance across a variety of themes, including Indonesian culture and society, public health, biodiversity, sustainable development, and entrepreneurship. Participants benefit from expert-led lectures, hands-on workshops, and interactive cultural experiences, gaining both academic insights and a deeper appreciation of Indonesia's diverse heritage.

Explore global issues through a local lens or deepen cross-cultural understanding. UNAIR's tailor-made programs offer an inspiring and impactful way to connect, learn, and grow in the heart of Indonesia.

Scholarships

ADS AIRLANGGA DEVELOPMENT SCHOLARSHIP

Airlangga Development Scholarship (ADS) is a prestigious scholarship program offered by Universitas Airlangga to international students from both developed and developing countries. The program aims to provide opportunities for international students to pursue Master's (S2) or Doctoral (S3) degrees at Universitas Airlangga. This is a degree-seeking program conducted in the Indonesian language, where international awardees are enrolled in regular classes alongside local students, with Indonesian as the language of instruction.

Benefits

Full Scholarship

- Living allowance: IDR 1.500.000 a month
- Accommodation: IDR 1.500.000 a month
- Health insurance provided by Universitas Airlangga
- Research allowance provided
- Settlement allowance: IDR 1.500.000
- Tuition fee waived
- Graduation fee waived
- Arrival ticket allowance: IDR 5.000.000 max (only once)
- Departure ticket allowance: IDR 5.000.000 max (only once)
- Covering the immigration application: VISA, KITAS, Stay Permit

Partial Scholarship

- Accommodation: IDR 1.500.000 a month
- Health insurance provided by Universitas Airlangga
- Research allowance provided
- Tuition fee waived
- Graduation fee waived
- Covering the immigration application: VISA, KITAS, Stay Permit

KNB KEMITRAAN NEGARA BERKEMBANG

Kemitraan Negara Berkembang Scholarship, popularly known as KNB Scholarship, is a financial assistance offered by the Indonesian Government to prospective international students coming from developing countries to pursue their degree (Undergraduate, Master's or Doctoral Degree) at one of the universities in Indonesia.

Benefits

- Tuition fee waived
- Living allowance
- Research and book allowance
- Journal publication allowance (for master's/doctoral degree students)
- Arrival allowance

- Accommodation
- Health insurance
- BIPA course free waived
- Round trip flight ticket

TIAS THE INDONESIAN AID SCHOLARSHIP

The Indonesian AID Scholarship is a fully funded scholarship program provided by the Government of Indonesia through the Indonesian Agency for International Development (LDKPI). The program aims to support the achievement of the Sustainable Development Goals (SDGs), particularly in the education sector, by offering opportunities for international students to pursue their studies in Indonesia. The scholarship is available for Undergraduate (S1), Master's (S2), and Doctoral (S3) degree programs

Benefits

- Academic cost
- Round trip ticket
- Visa cost
- Settle-in allowance
- Accommodation allowance
- Health insurance
- Monthly living allowance
- Education support fund
- Research grant
- International seminar grant
- International journal publication assistance fund
- Bahasa Indonesia enhancement program cost
- English lesson program cost (for applicants in kelas Bahasa Only)
- Matriculation program cost

EMPM THE EUROPEAN UNION MOBILITY PROGRAMME FOR MYANMAR

The European Union Mobility Programme for Myanmar (EMPM) is an EU-funded pilot programme that aims to protect Myanmar's next generation human capital with education and training. EMPM endeavours to attain this overall objective through enhancing options for online learning and mobility for Myanmar students and young professionals, who are affected by recent interruptions of university education and employment. This program is a top-up degree initiative designed for students from Myanmar whose education was interrupted, enabling them to continue their studies at universities in Indonesia.

Benefits

- Allowance
- Health insurance
- Education and training
- Learning courses
- Virtual mobility platform

UNAIR HOSPITAL

Officially operating since June 14, 2011, the hospital has grown into a leading teaching hospital and a national pilot project equipped with modern facilities, comprehensive medical services, digital and research innovations, and international accreditation. It has received numerous awards for its excellence in healthcare quality.

RSKI GRHA TRIMED

Universitas Airlangga established GRHA TRIMED-RS UNAIR as a research-based hospital and national referral center in collaboration with the Institute of Tropical Disease (ITD) and the BSL-3 Laboratory. The hospital focuses on developing research, innovation, and effective solutions to combat tropical and infectious diseases in Indonesia.

DENTAL & ORAL HOSPITAL

The Universitas Airlangga Dental and Oral Teaching Hospital is a specialized hospital providing comprehensive dental and oral healthcare services. It features a 24-hour Emergency Dental and Medical Unit, 169 dental chairs for outpatient care, inpatient wards of various classes, operating rooms, intensive care units, laboratories, and radiology services. As a teaching hospital, RSGM offers complete dental services ranging from basic care to specialized treatments, supporting both education and community service.

VETERINARY TEACHING HOSPITAL

The Universitas Airlangga Veterinary Teaching Hospital is a modern four-story facility that serves as a center for education, research, and community service in veterinary medicine. Equipped with advanced technologies such as computer radiography, ultrasonography, hematology analyzers, and three surgical rooms, RSHP functions as both a learning hub for students and a referral center for animal healthcare in East Java, strengthening UNAIR's position as a world-class university.

UNAIR BIKE

Universitas Airlangga, through the Directorate of Infrastructure, Environmental, and Operational Management, launched an environmentally friendly transportation innovation called "UNAIR BIKE," an electric bicycle designed to facilitate the mobility of the academic community, particularly on Campus C. Through this initiative, Universitas Airlangga not only provides convenience and comfort but also encourages its members to participate in environmental sustainability efforts. Users simply need to download the UNAIR BIKE application from the Play Store or App Store, register, and scan the QR code on the bicycle to start riding. The system is equipped with safety features such as notifications and automatic shutdown if the bicycle leaves the designated campus area. To support the use of these electric bicycles, Universitas Airlangga has provided several parking stations located in 15 strategic points.

DORMITORY (Student Residence)

The Universitas Airlangga Dormitory is an official student housing facility designed to provide comfort, safety, and a memorable living experience. Strategically located on Universitas Airlangga MERR-C Campus, the dormitory complex consists of an 11-story female dormitory with 206 rooms and a 5-story male dormitory with 96 rooms, accommodating more than 1,000 students. Each room is equipped with complete amenities such as a bed, wardrobe, study desk, and high-speed internet access. Supported by 24-hour security, study rooms, a prayer room, shared kitchen, and communal areas, the dormitory offers a conducive environment for studying and fostering social connections among students from various regions and countries.

FLASH BUS

Universitas Airlangga FLASH (Fast Local Area Shuttle) Bus is an official transportation service provided to support the mobility of the entire Universitas Airlangga academic community. Recognized by its distinctive yellow and blue design, this bus offers a free, safe, and efficient means of transportation connecting the university's three main campuses, Dharmahasada-A Campus, Dharmawangsa-B Campus, and MERR-C Campus. Operating from morning until late afternoon, the Bus FLASH serves as an eco-friendly solution that enables students, lecturers, and staff to travel comfortably without worrying about costs or delays between campuses. This service not only enhances time efficiency and inter-campus accessibility but also reflects Universitas Airlangga's dedication to fostering a modern, inclusive learning environment that values sustainable urban mobility.

LIBRARY

lib.unair.ac.id

Universitas Airlangga provides comprehensive library services with a diverse collection of printed books, e-books, national and international journals, theses, dissertations, and other digital reference sources. There are three libraries located across campuses: Dharmahusada-A Campus, Dharmawangsa-B Campus, and MERR-C Campus. All collections can be accessed through an online catalog system (OPAC) and an integrated e-resources platform, allowing students to explore academic literature efficiently.

Student Activity Units

- 7 Spiritual Clubs
- 9 Martial Art Clubs
- 10 Special Division Clubs
- 7 Art Clubs
- 10 Sport Clubs

To help students develop their potential beyond academics, Universitas Airlangga provides platforms in the form of Student Activity Units or student clubs. These units cover a wide range of fields, including arts, sports, spirituality, martial arts, and special divisions. Through club activities, UNAIR students have the opportunity to pursue their interests, achieve excellence at national and international levels, and make meaningful contributions to society. The student clubs continues to grow as a center for cultivating adaptive, innovative, and future-ready student leaders.

Testimonials

“ Education at Universitas Airlangga has been highly relevant to my role as a public leader. The philosophy I learned at UNAIR has become the foundation for making policies grounded in integrity and morality. UNAIR’s motto, Excellence with Morality, is a guiding principle I continue to uphold—a reminder that achievement should never come at the expense of integrity. ”

Agus Harimurti Yudhoyono

Coordinating Minister for Infrastructure and Regional Development

Ari Sufiati

Senior Project Manager at Apple Inc.

“ UNAIR must continue to look ahead with optimism. Enhancing the quality of human resources is essential to remain competitive on the international stage. The sky has no limit—anything is possible. Always think positively, keep moving forward, and continue growing with the abilities we have. Every challenge we face will make us stronger and more self-aware. ”

“ You guys can improve your skills and work in a hospital. You can improve your skills in speaking Indonesian if you want to. You can even start to know how the patient feels. So, I recommend it. ”

Emilija & Alvina Mockute

Klaipėdos Valstybinė Kolegija, Lithuania
